This is why your app modernization projects fail

14:20 - 15:10 | Breakout #3 - 1.04 | Level: 200 | Track: Azure

We've all been there. There's a legacy codebase that's old enough to go to a bar, and "surprisingly" it has become such a big ball of mud that adding new features or fixing bugs has become very time-consuming and expensive. And irritating enough for some people to consider resigning. At last the leadership team makes the decision - this big ball of...
